AGING

12 months in 500-liter barrels and 35 Hl oak barrels.

CLIMATE

An exceptional vintage, characterized by a high concentration, but where the harmony was yet maintained. The hot and dry summer, together with the constant ventilation from the sea, helped the slightly early ripening. Yields per hectare were low, as well as the wine yields because the grapes had a particularly thick peel.

TERROIR

SOIL
Calcareous with pH 8, mix of Clay-sand-limestone. Dark brown color

PRODUCTION AREA
Vineyards are placed on a hill at 70m over the sea level. Oriented towards the sea, full sun from the morning to the evening

DENSITY PLANTATION
6500 plants/hectare

YIELD
7500 kg/hectare
